UPCOMING WEB SEMINAR

Analog Test Instrumentation Workshop

When: Wednesday, May 2, 2007 at 2:00 PM (EDT)

This live web workshop will examine how to add performance and cost savings advantages to your tester with a new high-density analog instrument, the Ai-760. The new Ai-760 enables Automatic Test Systems (ATS) integrators and Test Program Set (TPS) developers to achieve higher tester performance with lower costs. Learn how Teradyne's new analog test instrument simplifies system configurations, provides parallel test capability to increase test throughput, and reduces tester footprint.
