

UPCOMING WEB SEMINAR

Best-Practice ICT Techniques and Benefits of Integrating Goepel Electronics' SCANFLEX Boundary Scan System with Teradyne's TestStation

When: Wednesday, April 11, 2007 at 9:00 AM and 3:00 PM (EDT).

Automated In-Circuit Test (ICT) and JTAG/Boundary Scan (IEEE Std. 1149.1) are valuable tools in today's manufacturing environment. The best integration of these two technologies can overcome difficult coverage challenges and provide greater test capabilities as complexity and production vary. This 45-minute webinar will explore the methods and benefits of integrating Teradyne's TestStation™ and Goepel Electronics' SCANFLEX™ boundary scan hardware/software system. Presenters include Goepel's Heiko Ehrenberg, manager of US operations and Charles Robinson, Teradyne senior field applications manager.
