

Applications Services

ADVANTAGE OF APPLICATIONS SUPPORT WITH TERADYNE

- *Controlled costs*
- *On-demand resources*
- *Dependable results*
- *Professional project managers*

Global Support Services

As a global leader in electronics testing and production solutions, Teradyne Assembly Test Division offers comprehensive support services – wherever you may be. With an extensive network of direct applications engineers located worldwide, we are prepared to rapidly respond to your needs.

Teradyne's Applications Group specializes in providing test solutions to meet your test development or production requirements, production repeatability, and tester throughput needs. Leveraging the latest test methods, development tools and process capabilities—along with our global expertise—we ensure optimum product performance in the quickest shortest time. Our services minimize your development costs and deliver solutions that continue to provide maximum throughput, performance, and quality.

Application Services

Your use of the Teradyne applications group can range from contracting for a full-time onsite engineer to utilizing Teradyne test-process support and management. You can completely outsource your test engineering to Teradyne or work with us to train your test engineers.

Teradyne will tailor a program to meet your unique needs. Our engineers can assist you with all stages of the test process including evaluation of new or existing test process and operation, consultation on test techniques, and application of new test equipment or methods.

- **Consultation Services**
 - Evaluate and optimize test sets
 - Test strategy analysis
 - Test process analysis
- **Training Services**
 - Train test engineers at Teradyne facilities or at your site
 - Custom training and development
- **Test Program Set Services**
