

Test Program Set Rehost Services

ADVANTAGE OF REHOSTING WITH TERADYNE

- *Controlled costs*
- *Dependable results*
- *Minimum impact on resources*
- *On-time results*

Global Support Services

As a global leader in electronics testing and production solutions, Teradyne Assembly Test Division offers comprehensive support services – wherever you may be. With an extensive network of direct applications engineers located worldwide, we are prepared to rapidly respond to your needs.

Teradyne's Applications Group specializes in providing test solutions to meet your test development or production requirements, production repeatability, and tester throughput needs. Leveraging the latest test methods, development tools and process capabilities—along with our global expertise—we ensure optimum product performance in the quickest shortest time. Our services minimize your development costs and deliver solutions that continue to provide maximum throughput, performance, and quality.

Why Choose Teradyne to Rehost Your TPSs?

As your older testers become obsolete, you realize that they need to be replaced with state of the art test equipment. The challenge is not the new tester; the challenge is how to convert your multiple TPSs to operate on the new tester platform and to know you are getting the same or better coverage and quality product from the new tester.

Teradyne's experts can quickly take your existing TPSs and rehost them to run on your new Teradyne equipment. The use of Teradyne programming personnel, who understand both the programming and test of the multiple test platforms, can provide you with a turn-key, high-quality test program which assures you the quality you need.

Rehosting with Teradyne

Optimizing your test and inspection programs and fixtures for quality and reliability will save cost and maximize uptime. You can count on Teradyne to ensure this conversion is successful and provides the benefits you expect from moving to newer equipment.

- Conversion of test programs for:
 - L-Series™ to S-9xxx
 - Spectrum™ to TestStation™
 - Z18xx to TestStation SE and Spectrum 88xx
 - TestStation to TestStation SE and Spectrum 88xx
 - L-Series to Spectrum 88xx
- Teradyne will also convert non-Teradyne platforms to Teradyne platforms
