

Transfer Express

... When you're ready to port device testing to a production test facility ...

Transfer Express leverages TAG's global presence and project management standards to port your program to production quickly and dependably ... anywhere.

The continuing influx of new device designs leaves fewer resources available for the important task of porting your test program into production testing. Transfer Express provides a customizable service package to address your specific needs.

TAG closely manages and coordinates the production release activities between the origin and destination locations.

*** TRANSFER EXPRESS COMPONENTS ***

- Test cell configuration readiness
- Sample device test data collection at the origin
- Correlation to acceptance criteria
- Sample device test data collection at the destination
- Correlation of DUT response (data analysis & reporting)

TRANSFER EXPRESS ADVANTAGES

- Global Presence that delivers
- Frees up your engineering resources
- Production site support readiness
- Efficient and Convenient

*** FEEDBACK ***

"Transfer Express works! Bring-up in 5 days compared to 10-15 days with previous transfers!"
(Fabless/Subcon Eng Mgr [Asia])

"Great news, <subcon> probed 200 correlation devices giving us 94% yield and confirmed the test time at <☺> seconds. Job well done!"
(Test Mgr - US Fabless Company)

"The Transfer Express process...facilitates close team communication, leaving little room for surprises."
(TAG Managers [Development side])
