

Teradyne Conflict Minerals Policy

The term "conflict mineral" refers to minerals and their derivatives, such as tantalum, tin, tungsten, and gold, which have been linked to the funding of armed groups in the "conflict region" of the Democratic Republic of the Congo and adjacent countries (DRC). Minerals and derivatives are classified as conflict minerals regardless of where they are sourced, processed, or sold.

In 2010, Section 1502 of the Dodd-Frank Act, which aims to prevent the use of conflict minerals that directly or indirectly finance or benefit armed groups in the conflict region, was signed into law. The Act requires companies to perform due diligence with respect to the sourcing of conflict minerals and to file annual reports relating to the use of conflict minerals. Teradyne supports the goals and objectives of Section 1502 of the Dodd-Frank Act; therefore, Teradyne is committed to using conflict-free minerals in its products and complying with the conflict minerals due diligence and reporting obligations required under the Act. Teradyne complies with Responsible Business Association (RBA) Code of Conduct, supports the objectives of the responsible minerals initiative (RMI), and performs due diligence to ensure that it does not purchase any products, components, or materials that fund armed groups. Teradyne is committed to not sourcing materials that fund conflict in the DRC and adjoining countries and is committed to source materials from conflict free areas within the DRC as well as other conflict free parts of the world.

Teradyne is also committed to sourcing components and materials from companies that share our values around human rights, ethics and environmental responsibility. Teradyne suppliers are required to comply with Teradyne's Supplier Code of Conduct, which includes requirements relating to conflict minerals and responsible sourcing. Suppliers are responsible for passing these same requirements onto their suppliers.

Teradyne's Supplier Code of Conduct requires suppliers to implement a policy and process to reasonably assure that the mining of the tantalum, tin, tungsten and gold in the products they manufacture does not directly or indirectly finance or benefit armed groups that perpetrate human rights abuses in the DRC. Teradyne expects its suppliers to comply with the RBA Code of Conduct and the RMI Conflict Free Smelter Program. In compliance with said programs, suppliers shall exercise due diligence on the source and chain of custody of these minerals and make their due diligence measures available to Teradyne.

Teradyne appreciates the commitment of its suppliers to the goal of using conflict-free minerals in its products and in supporting Teradyne's conflict free sourcing policy.

Teradyne has a toll-free, confidential hot line (1-866-388-1288) for reporting complaints relating to Teradyne's Conflict Minerals Policy, its Conflict Minerals program and its Form SD and Conflict Minerals Report. In addition, any questions concerning its policy, program or reports may be sent to Teradyne's dedicated e-mail box, conflict.minerals@teradyne.com.
