

To: Teradyne's ZT-Series Instrument Customers  
Date: July 1, 2015  
Subject: **Errata to End of Production Notice published March 18, 2014**

As per the ZT-Series End of Production notice that was published on March 18, 2014, ZT621 was listed as an active production product.

However, that was a publishing error. ZT621 is **not** an active production part. Teradyne ended ZT621's production in conjunction with the other ZT-Series products that were announced as part of the March 18, 2014 End of Production Notice. Still, Teradyne does support calibration and repair for ZT621 on a reasonable commercial effort basis. All other information on the End of Production Notice dated March 18, 2014 is correct.

The table below lists active production ZT-Series products:

ZT4210 Series	ZT4620 Series	ZT824
ZT4420 Series	ZT5150 Series	
ZT4440 Series	ZT5210 Series	
ZT4610 Series	ZT8440 Series	

**Table 1: Active Production ZT-Series Products**
